About US

Takweem Pack is a global technology-driven custom flexible packaging company committed to our mission of helping brands of all sizes grow with the highest quality Standup Pouches, Pillow Pouches, Laminated PET+PE rolls, BOPP rolls, PP Woven Bags, and other connected packaging solutions. We strive to be accretive and philanthropic in the communities we serve, while remaining ever vigilant in our role as stewards of our environment.

PRINTED ZIPPER BAGS

Zipper bags, also known as Ziplock bags or resealable bags, are versatile storage pouches made from flexible plastic materials. They feature a secure zipper closure mechanism along the top edge, allowing for easy opening & resealing multiple times. Zipper bags are commonly used for storing and organizing a wide range of items, from food and snacks to office supplies, crafts, and travel essentials.

STAND UP POUCHES

Stand-up pouches combine durability, reseal ability, and eye-catching design to make your brand stand out effortlessly.

SPOUT PACK

A spout pack is a flexible pouch with a built-in spout for easy dispensing of liquids or semi-liquids like beverages, sauces, and cosmetics. It offers convenience, portability, and excellent shelf life preservation, making it ideal for various industries including food, beverage, and personal care.

PRINTED LAMINATED BOPP ROLL

Laminated BOPP rolls are versatile packaging sheets made of layers of Biaxially Oriented Polypropylene film. They're known for clarity, strength, and moisture resistance, ideal for enhancing shelf life and showcasing vibrant graphics. Used widely in flexible packaging, they protect snacks, confectionery, and personal care items with effective barrier properties.

PILLOW POUCHES

Pillow pouches are flexible packaging bags with a pillow-like shape when filled. They are commonly used for a variety of products like snacks and personal care items, offering efficient shelf display and protective sealing to maintain product freshness.

KRAFT WINDOW POUCHES

Kraft window pouches feature a Kraft paper exterior with a transparent window, offering a rustic appearance combined with visibility of the packaged contents. They are popular for their eco-friendly appeal and ability to showcase products such as snacks, coffee, and organic goods while providing barrier protection against moisture and light.

NON-WOVEN BAGS

Non-woven bags are eco-friendly alternatives to plastic bags, made from spunbonded polypropylene (PP) or polyethylene (PE) fibers.

PP WOVEN BOPP LAMINATED BAGS

PP woven bags with BOPP lamination are a type of packaging material that combines the strength of polypropylene (PP) woven fabric with the visual appeal and barrier properties of Biaxially Oriented Polypropylene (BOPP) film lamination.

GIFT PAPER BAGS

Gift bags are decorative containers used for presenting gifts conveniently and stylishly. They come in various materials, sizes, & styles, often featuring handles and decorative elements like ribbons. Ideal for various occasions, they offer a quick and attractive alternative to traditional wrapping paper.

GARBAGE/TRASH BAGS

A garbage bag is a disposable plastic or biodegradable bag used for collecting and disposing of household or commercial waste, ensuring clean and hygienic waste management.

LDPE PLAIN/PRINTED BAGS

An LDPE custom bag is a flexible and durable packaging solution made from Low-Density Polyethylene. It is tailored to specific needs with options for size, thickness, closures, printing, and color, suitable for various industries to package a wide range of products.
